WATER TREATED WITH ALUM AND CHLORINE IS INJURIOUS TO HEALTH

Many of us have experienced, that by change in water at some outstation, we feel better appetite and clearing of bowels, but Delhites have no option, but to use the water treated with alum and chlorine. The chlorine is mixed in two stages. In normal cases, the chlorine mixed is 0.50 to 3.00 mg. and 1.25 to 1.50 mg., whereas the alum used is 20 to 60 mg. per litre. Depending upon the quality of raw water, even much higher quantities of both are used. *After treatment, the water is pumped to city reservoirs and again pumped to O.H. tanks. Thus the dissolved alum and chlorine while moving with velocity forcefully rub against the surface of the pipelines and this is how, lot of churning takes place and by the time reach to our kitchen, they act as potentised homoeo remedies*, because in this process, two principles of homoeopathic pharmacopia, that is 1. atomization and 2. supplying kinetic energy by succussion are fully satisfied. Thus a remedy of unknown potency is just pumped into our body. Those who know the process of preparing homoeo drugs, will quickly understand this. This is why, as per Boerick-materia-medica of Homoeopathy (Page 199-Edition 1983), the dissolved chlorine behaves as Chlorum, whose chief symptoms are:-

1. Sudden Dyspnea from spasm of vocal cord. 2. Tendency to Gangrene and Extreme dryness of tongue. 3. Constriction with suffocation and **marked loss of memory specially for names.**

The chief symptoms, of the potentised alum (Alumen) (Boerick-Page 32-33, Edition 1983) are:-

1. *Constriction of every organ of the whole body.* 2. *Constipation of the most aggravated kind.* 3. *No desire for stool for days.* 4. *Violent ineffectual urging to stool.* 5. *No ability to expel stool.* 6. *Marble like masses pass, but rectum still feels full.* 7. *Hemorrhoids* 8. *Hemorrhage from bowels.* 9. *Tendency to induration of neck of uterus and mammary glands.* 10. *Chronic gonorrhoea with lumps along urethra.* 11. *Asthma.* 12. *Difficult to expel mucous specially in old people.* 13. *Ulcers with indurated base.* 14. *Scrotal eczema, Itching in anus and on back of penis.* 15. *Glands inflame and harden.* 16. *Alopecia.* 17. *Weakness of all muscles specially arms and legs.* 18. *Worse in cold weather.*

Those who sometimes had toothache and tried the solution of alum in water by keeping the same into the mouth for say about 10-15 minutes, must have experienced a great deal of constriction of muscles of mouth, gums and teeth etc. This is what is happening constantly on whole of our body, as we are swallowing tons of water since years. The strong tendency of alum to cause constriction besides other organs adversely effects intestines and causes worse type of constipation. Once the constipation occurs, the flatus due to putrefaction rises upwards and swells the intestines and further creates pressure on plexus of arteries, veins and nerves connected with intestines, liver, pancreas, stomach, lungs, heart and kidney etc. Thus the normal functioning of these organs become sluggish. Continuous use of this treated water for years goes on impairing and weakening the system. Lot of vital energy is constantly consumed to excrete these two damaging foreign elements. *Specially the residual alumen/alumina converted to homoeo remedy is causing the problem to the people. Those who have very poor vital energy, fall prey of several diseases very early e.g., blood pressure, diabetes, alopecia, prostrate, cataract, joints pain, arthritis, angina and paralysis etc.* Rest of the users come under the grip slowly. Somehow, not many people are able to observe the great damage being caused to them, because very few people are gifted with powers of fine observation like that of the Master Hahmaeman. Any common man normally compromises with some purgative e.g., *Isabgole, Trifla and Vaculax etc.* It may be noted, that all the people do not suffer from the same disease. It depends, which particular system has damaged e.g., lung, liver, pancreas, heart, kidney, muscle etc.

CAUTION : To treat the above common diseases, modern medicines are used, which carry side effects. *The alum and chlorine act as serious obstructions*, therefore, Homoeo remedies, whatever best chosen, *show perverted action* and so the patient never gets cured. *The gas-free stomach of a yogi and a labourer is like a bowl and is the index of good health. The yogasanas e.g., Sutraneti, Dhauti, Nauhi, Kunjal sankh-Prakshalana etc. throw away all kinds of waste (stool, urine, sputum, sweat and gas) from the body, but the gas hampers this process very adversely, hence the benefits of yogasanas to any common practitioner are reduced to the barest minimum. All this is going on due to gross ignorance of W.H.O. according to whose standards the water is treated.*

PERSONAL EXPERIENCE ON CHANGE OF DRINKING WATER : Hyper sensitivity, nervousness, scrotal eczema and Blood pressure vanished. Appetite and clearing of bowels improved. Effects of Homoeo-drugs is much better than before. *Homoeopaths are requested to conduct study on self and on patients as well.*

ADVICE : After boiling chlorine is ousted, but alum/alumina remains, which is specially very harmful. There is no filtering system so far known, which can remove homoeo drug made from alum/alumina. Hence the advice is to **STOP TAP WATER FOR DRINKING PURPOSE, and use the Alum and Chlorine free potable water (ISI NO. 10500) or genuine bottled water (ISI NO. 14543).** It is sweet in taste and contains minerals for better upkeep of digestive system. It is hoped, that this may protect Delhites from several ensuing diseases, *as because the water plays a very major role for good health.* Other precautions to keep you fit are:-

1. Yoga 2. Jogging 3. Pranayam 4. Lead disciplined and tension free life 5. Timely eating habit 6. Balanced diet, Rich with fibrous green vegetables and fruits. *With best wishes for good health.*
